Current Address:
Charlottesville, VA 22903

EDUCATION

University of Virginia, Charlottesville, VA

August 2024 - May 2028

BS in Computer and Electrical Engineering | Minor: General Business | QuestBridge Scholar

Relevant Coursework: Data Structures and Algorithms, Intro to Cybersecurity, Computer Systems and Org 1, Digital Logic Design, Applied Circuits, Signals and Systems, Calculus 3, Discrete Math Theory, Ordinary differential equation

TECHNICAL SKILLS

- Software: Python | Java | Javascript | React.js | SQL | Assembly | C | Rest APIs | workflow automation
- Electrical/hardware: CAD | KiCad | Matlab | VHDL
- Cybersecurity & Networking: Penetration testing | Nmap | SQL injection | BurpSuite | HacktheBox CTFs
- Data and Reporting: Microsoft Excel (pivot tables, formulas, reporting), PowerPoint (executive presentations)

WORK EXPERIENCE

Cybersecurity Analyst Intern

University Of Virginia ITS, Charlottesville, VA

September 2025 - Present

- Analyzed 500+ weekly security and system events in Splunk, transforming log data into actionable insights that improved operational decision-making and reduced false positives by 20%
- Supported incident triage, documentation, and escalation with 6 interns in a production enterprise IT environment, enhancing response efficiency by 40% and cross-team coordination by 60%
- Applied data analysis to support operational decision-making and risk evaluation for 100+ security incident in a high-volume environment
- Partnered with 5 senior analysts to enhance detection workflows and optimize monitoring processes

Student Admin

UVA School of Data Science, Charlottesville, VA

September 2024 - Present

- Managed IT asset inventory end-to-end and coordinated cross-department requests, improving delivery timelines by 30%
- Owned end-to-end development of a web application used by executive leadership and around 50 employees everyday to automate expense and travel tracking, eliminating manual reporting and email back-and-forth
- Translated stakeholder requirements into technical solutions, balancing usability, data accuracy, and scalability

KEY PROJECTS

AI Resume Analyzer (Resumify)

- Built an AI resume analyzer with React.js Router v7 and Puter.js backend.
- Provided tailored resume feedback based on job and company data and attracted 200+ users.

Uspot - Startup

Founder

- Built an MVP in a 7-hour Claude-for-Good hackathon: a campus platform aggregating real-time events through a map-based and event card interface, focused on helping students find any event around the campus with a click of a button
- Currently working on launching the full app, placed 6th out of 50 teams overall in the competition, 3rd in our category and secured 40+ users on the app's current waitlist

Boost Converter

- Designed the schematic and PCB in KiCad for a DC-DC boost converter, including component selection and layout
- Assembled and soldered the circuit leveraging a 555 timer and verified a 5 V to ~13 V DC boost using WaveForms

CERTIFICATIONS

- Google Professional Cybersecurity Certified: Learned core cybersecurity principles, threat detection, and incident response.
- Microsoft: Azure Cloud Fundamentals (AZ-900): Demonstrated understanding of cloud concepts and core Azure services.
- AWS: Machine Learning Foundation: Gained foundational knowledge of machine learning concepts on AWS.
- Udacity: Intro to Gen Ai with AWS: Built introductory skills in generative AI and LLMs using AWS.

EXTRACURRICULARS

Students Who advance in Technology (SWAT), Charlottesville, VA

Vice-President

April 2025 - Present

- Co-lead a 50+ member student organization focused on delivering technology solutions ranging from process automation to refurbishing and deploying tech for UVA departments and Charlottesville organizations.
- I am leading a partnership with the School of Data Science Administration to automate administrative workflows, a project projected to increase efficiency by 20%
