Current Address:
Charlottesville, VA 22903

EDUCATION

University of Virginia, Charlottesville, VA

August 2024 - May 2028

BS in Computer and Electrical Engineering | Minor: General Business | QuestBridge Scholar

Relevant Coursework: Data Structures & Algorithms, Intro to Cybersecurity, Computer Systems & Org, Digital Logic Design, Applied Circuits, Signals & Systems, Calculus 3, Discrete Math, and Ordinary Differential Equations

TECHNICAL SKILLS

- **Software:** Python | Java | JavaScript | React.js | Assembly | C | REST APIs | Ansible | Workflow Automation | Git | Linux
- **Electrical/Hardware:** CAD | KiCad | MATLAB | VHDL | Circuit Design | PCB Layout | Oscilloscope | Signal Analysis
- **Cybersecurity & Networking:** Penetration Testing | Nmap | BurpSuite | Splunk | Wireshark | Kali Linux | HackTheBox
- **Certifications:** Google Professional Cybersecurity | Microsoft Azure AZ-900 | AWS ML Foundation | Udacity Gen AI (AWS)

WORK EXPERIENCE

Security Engineering Intern

GuidePoint Security, Reston, VA

June 2026 - Present

- Engineering **SOC-in-a-Box**, a portable SOC lab integrating **Splunk**, Velociraptor, **OpenVAS**, and Active Directory on segmented Proxmox/Ludus infrastructure with firewall rules, authentication controls, and VLAN network isolation
- Developing **Ansible** playbooks to automate VM provisioning and building a **Python** CLI (soccli.py) with tiered deployment profiles (Basic | Standard | Advanced) enabling hardware-aware one-command SOC deployment
- Documenting infrastructure setup, troubleshooting procedures, and known issues to support team onboarding and reproducibility across deployment environments

Cybersecurity Analyst Intern

University of Virginia ITS, Charlottesville, VA

September 2025 - Present

- Analyzed **500+** weekly security events in **Splunk**, applying network forensics techniques to reduce false positives by **20%** and support triage of **100+** security incidents in a production enterprise environment
- Coordinated with **6 interns** on incident documentation and escalation across cloud and on-prem environments, improving response efficiency by **40%** and cross-team coordination by **60%**; partnered with 5 senior analysts to optimize detection workflows and monitoring processes

Student Admin

UVA School of Data Science, Charlottesville, VA

September 2024 - May 2026

- Owned end-to-end development of a web application used by **~50 employees** and executive leadership daily to automate expense and travel tracking, fully eliminating manual reporting and improving delivery timelines by **30%**
- Translated stakeholder requirements into scalable technical solutions, balancing usability, data accuracy, and cross-department coordination while managing IT asset inventory end-to-end

KEY PROJECTS

AI Resume Analyzer (Resumify)

- Built with React.js Router v7 and Puter.js backend; delivers tailored AI-powered resume feedback based on job description and company data, attracting **200+ users** since launch

Uspot - Startup | Founder

- Built a campus event-aggregation MVP in a 7-hour Claude-for-Good hackathon: map-based platform for real-time event discovery; placed **6th out of 50 teams** (3rd in category), secured **20+ waitlist users**
- Currently developing the full app with live event feeds, club integrations, and push notifications for UVA students to discover events instantly

Audio-Reactive LED Driver PCB

- Designed full schematic and PCB in **KiCad**: AC summing amp, Sallen-Key LP/HP filters, peak detectors, triangle-wave oscillator, and analog + PWM LED drivers; assembled, soldered, and verified signal integrity with WaveForms

EXTRACURRICULARS

Students Who Advance in Technology (SWAT), Charlottesville, VA

President

April 2025 - Present

- Founded and lead a **20+ member** tech consulting organization partnering with **3 UVA departments** per semester to deliver real automation and software solutions, from scoping through build to live presentation
- Confirmed Data Science School partnerships for conference scheduling and expense report automation; actively scoping a third departmental project with UVA ITS
